OMNIA BIOLOGICS AND BIOTECH EXPERTS SIGN DEVELOPMENT AGREEMENT

(January 12, 2010 – Rockville, MD) Biologics contract manufacturer Omnia Biologics, Inc. (Omnia) (Rockville, MD) and biologics manufacturing and process development consultants Biotech Experts, Inc. (Clarksburg, MD) today announced a deal for manufacturing and process development services.

Omnia is a contract manufacturer focused on process development and clinical trials material manufacturing of innovative biopharmaceuticals. Biotech Experts accelerates development of new biological therapies for life-threatening diseases by providing consulting services to the biotech community. Biotech Experts represents decades of experience in the biotech industry.

“Dr. Vladimir Slepushkin and his team’s breadth of experience in biologics from R&D through clinical development in a wide variety disease targets and platforms make Biotech Experts services truly unique and valuable,”- Dr. Dale VanderPutten, CEO of Omnia commented on the deal. “Their pioneering work in adenovirus and lentivirus vectors, and cell line development was crucial to moving several novel products from bench to clinic.”

About Omnia Biologics: (www.omniabiologics.com)

Omnia offers services in the areas of process development, GMP manufacture, and fill-finish for preclinical and clinical programs for therapeutics that do not have effective or known manufacturing protocols. These include vaccines, autologous therapeutics, new gene therapeutic platforms, and stem cell technologies. The company seeks and has established relationships with both biopharmaceutical companies and academic investigators throughout the world.

About Biotech experts: (www.biotechexperts.net)

Biotech Experts, Inc. is a closely held consulting company aiming to create a link between experts in various biotechnological fields and start-up companies or academic scientists, looking to expand their bench-top discoveries into clinical programs. Knowing obstacles on the FDA-regulated path from the bench to the clinic we can help you avoid drawbacks and long time delays. We have significant expertise in almost every aspect of biological product development.
